The new Middle and Elementary School building was the second academic building constructed on Briarcrest's Main Campus. The site and building was strategically laid out in an effort to maximize circulation and visibility between the existing High School building and the future Performing Arts building. The new facility includes a 500 seat gymnasium, lockers rooms, a 450 seat cafeteria and multipurpose space, science labs, choir and band rooms, an Elementary and Middle School Library, as well as athletic fields and playgrounds. The addition of the new Middle and Elementary School has provided Briarcrest families with a "one stop shop" for their K-12 education.

"We have used Fleming Architects on every building campaign we have had at the Houston Levee Main Campus. The architects and designers were easy to work with, they listened, and have always been responsive to our needs and requests."

- Beth Rooks, Director of Communications Briarcrest Christian School
